TO WHOM IT MAY CONCERN:

VICMAR ENGINEERING TURBO WASHING SYSTEM

I was present when the Vicmar Turbo Washing System was installed on the starboard main engine of the M/Y Seaspam "Greg". At that time the turbochargers, aftercoolers and inlet manifolds were dismantled, inspected and photographed. Approximately three weeks after the washing system was installed I observed the same parts being dismantled, inspected and photographed, I was amazed at how clean the parts were. I have also seen test results which show significant fuel savings.

Yours truly
